# NEW TRENDS IN PHOTOELECTROCHEMISTRY

## GUEST EDITORS: F. DECKER AND B. SCROSATI

| | | |
|---|---|---|
| | i | ISE pages |
| F. DECKER and B. SCROSATI | 1 | Editorial |
| H. GERISCHER | 3 | Photoelectrochemical catalysis of the oxidation of organic molecules by oxygen on small semiconductor particles with $TiO_2$ as an example |
| M. SCHIAVELLO | 11 | Some working principles of heterogeneous photocatalysis by semiconductors |
| J. P. H. SUKAMTO, C. S. MCMILLAN and W. SMYRL | 15 | Photoelectrochemical investigations of thin metal-oxide films: $TiO_2$, $Al_2O_3$ and $HfO_2$ on the parent metals |
| F. DI QUARTO, S. PIAZZA and C. SUNSERI | 29 | The photoelectrochemistry of thin passive layers. Investigation of anodic oxide films on titanium metal |
| D. ZANE, F. DECKER and G. RAZZINI | 37 | Characterization of electrodeposited $TiO_2$ films |
| J. AUGUSTYNSKI | 43 | The role of the surface intermediates in the photoelectrochemical behaviour of anatase and rutile $TiO_2$ |
| E. PELIZZETTI and C. MINERO | 47 | Mechanisms of the photo-oxidative degradation of organic pollutants over $TiO_2$ particles |
| D. E. WILLIAMS, A. R. J. KUCERNAK and R. PEAT | 57 | Photoelectrochemical imaging—Part I. Background and theory |
| A. R. J. KUCERNAK, R. PEAT and D. E. WILLIAMS | 71 | Photoelectrochemical imaging—Part II. The passivating oxide film on iron |
| G. RAZZINI, L. P. BICELLI and B. SCROSATI | 89 | Effects of visible light on hydrogen permeation in metals |
| F. DECKER, D. A. SOLTZ and L. CESCATO | 95 | From photocorrosion to photoelectrochemical etching |
| P. A. KOHL and D. B. HARRIS | 101 | Photoelectrochemical methods for semiconductor device processing |
| YU. V. PLESKOV and M. D. KROTOVA | 107 | Photosplitting of water in a photoelectrolyser with solid polymer electrolyte |
| C. GRAMACCIONI, A. SELVAGGI and F. GALLUZZI | 111 | Thin film multi-junction solar cell for water photoelectrolysis |
| S. CATTARIN and H. TRIBUTSCH | 115 | Non-linear and pulse phenomena during $H_2O_2$ reduction at chalcopyrite (photo)cathodes |
| V. ANTONUCCI, A. S. ARICÒ, I. IELO, E. MODICA, G. CANDIANO, G. MONFORTE, N. GIORDANO and P. L. ANTONUCCI | 123 | Natural pyrite-based electrodes for photoelectrochemical applications |
| Y. UENO, K. YAMADA, T. YOKOTA, K. IKEDA, N. TAKAMIYA and M. KANEKO | 129 | Photoresponsive electrode based on the reaction between oxygen and the excited $Ru(bpy)_3^{2+}$ complex incorporated in a coated Nafion film |
| M. MASTRAGOSTINO, C. ARBIZZANI, A. BONGINI, G. BARBARELLA and M. ZAMBIANCHI | 135 | Polymer-based electrochromic devices—I. Poly(3-methylthiophenes) |

H. TRIBUTSCH, G. SCHLICHTHÖRL and L. ELSTNER — 141 — Microwave (photo)electrochemistry: new insight into illuminated interfaces

A. FUJISHIMA, R. X. CAI, J. OTSUKI, K. HASHIMOTO, K. ITOH, T. YAMASHITA and Y. KUBOTA — 153 — Biochemical application of photoelectrochemistry: photokilling of malignant cells with $TiO_2$ powder

159 Papers in Press

161 Electrochemical Calendar

## NUMBER 2/3

i ISE pages

S. DANIELE and M. J. PENA — 165 — Cyclic voltammetric investigation of the Cu–histidine system at platinum conventional and microelectrodes

S. WASMUS and W. VIELSTICH — 175 — Electro-oxidation and reduction of dimethylsulfoxide and sulfolane in aqueous acid solution—an on-line MS study

S. WASMUS and W. VIELSTICH — 185 — The electro-oxidation of formic acid, formamide and dimethyl-formamide in aqueous acid solution—a comparative study using on-line MS

D. BRUMHEAD, L. T. CANHAM, D. M. SEEKINGS and P. J. TUFTON — 191 — Gravimetric analysis of pore nucleation and propagation in anodised silicon

A. M. POLCARO, S. PALMAS and S. DERNINI — 199 — Electrochemical reduction of carbonyl compounds at modified carbon felt electrodes

K. KVASTEK, V. HORVAT-RADOŠEVIĆ, D. HODKO and V. PRAVDIĆ — 205 — Electrochemical impedance of anodic films formed on $Fe_{80}B_{20}$ glassy metal in borate buffered and acid sulfate solutions

S. POUZET, N. LE BOLAY and A. RICARD — 217 — Polymerization of pyrrole in a pulsed bed electrode: mass transfer study

T. D. TRAN, I. LONDNER and S. H. LANGER — 221 — Electrogenerative oxidation of dissolved alcohols with platinum–graphite packed bed catalysts

J. F. RODRÍGUEZ, D. L. TAYLOR and H. D. ABRUÑA — 235 — Concentration dependence of the underpotential deposition of silver on Pt(111): electrochemical and *uhv* studies

N. PAPAGEORGIOU and F.-P. EMMENEGGER — 245 — The effect of cosolvents and additives on the electrochemical properties of $[(Me)_3PhN][Al_2Cl_7]$ melts

Cs. VÉRTES, M. LAKATOS-VARSÁNYI, W. MEISEL, A. VÉRTES, P. GÜTLICH and L. KISS — 253 — Conversion electron Mössbauer study of low carbon steel polarized in aqueous sulfate and sulfite containing sulfate solutions

J. NIU and S. DONG — 257 — Applications of rapid scan spectroelectrochemistry—determination of heterogeneous electron transfer rate constant of Biliverdin oxidation

J. CROUSIER, Z. HANANE and J-P. CROUSIER — 261 — A cyclic voltammetry study of the NiP electrodeposition

Z. WANG, X. JIN, S. CAI, Y. LIU and A. FUJISHIMA — 267 — A study of ultraweak luminescence in evolution of oxygen at Pt electrodes

M. D. LEVI and M. LAPKOWSKI — 271 — Mechanism of electron transfer during the course of oxidation of N-phenyl-P-phenylenediamine on polythiophene and poly-3-methyl-thiophene coated electrodes: redox catalysis versus outer-sphere heterogeneous electron transfer

H. BALTRUSCHAT, M. BELTOWSKA-BRZEZINSKA and A. DÜLBERG — 281 — Reactions of halogenated hydrocarbons at platinum group metals. Part I: a DEMS study of the adsorption of $CH_3CCl_3$

F. CLIMENT, R. CAPELLADES and J. CIL — 285 — Frequency dependence of capacitance and series resistance of $Ta/Ta_2O_5$/electrolyte

| | | |
|---|---|---|
| G. Oskam, D. Vanmaekelbergh and J. J. Kelly | 291 | The influence of electrodeposited gold on the properties of III–V semiconductor electrodes—Part 1. Results of current–potential measurements on p-GaAs |
| G. Oskam, D. Vanmaekelbergh and J. J. Kelly | 301 | The influence of electrodeposited gold on the properties of III–V semiconductor electrodes—Part 2. A study of the impedance due to gold-related surface states at p-GaAs electrodes |
| D. J. Walton, S. S. Phull, D. M. Bates, J. P. Lorimer and T. J. Mason | 307 | Ultrasonic enhancement of electrochemiluminescence |
| C. Cachet, R. Wiart and J. Zoppas-Ferreira | 311 | Zinc deposition and dissolution in a flow-through porous electrode |
| G. G. O. Cordeiro, O. E. Barcia and O. R. Mattos | 319 | Copper electrodissolution mechanism in a 1 M sulphate medium |
| G. Moinet, G. Simonneaux, M. Autret, F. Hindre and M. Le Plouzennec | 325 | Electroreduction of porphyrin with a 4-nitrophenyl group in the meso position. Preparation of nitroso and amino derivatives in a "redox" cell |
| P. Schaetzel and B. Auclair | 329 | Mass transfer through a weak acid ion-exchange membrane |
| B. A. Lopez de Mishima, T. Ohtsuka and N. Sato | 341 | A study of the discharge process of manganese oxide in borate solution using *in situ* techniques |
| V. M. Schmidt and J. Heitbaum | 349 | Ion exchange mechanism of polypyrrole and poly-N-methylpyrrole with toslylate as doping anion: an electrochemical quartz crystal microbalance study |
| J. Y. Becker and T. A. Koch | 357 | Electrochemical conversion of 2-hydroxybiphenyl to 2-phenyl-1,4-benzoquinone(PhQ) and scaling-up |
| G. Róg, W. Pycior, K. Zakuła, A. Kozłowska-Róg and M. Bućko | 365 | Calcium-beta″-alumina: preparation, properties and application to the solid oxide galvanic cells |
| H. Durakpasa, M. W. Breiter and B. Dunn | 371 | Impedance studies on sol-gel materials |
| Z. Gao, J. Bobacka and A. Ivaska | 379 | Electrochemical impedance spectroscopy of cobalt(II)-hexacyano-ferrate film modified electrodes |
| A. Popov, N. Dimitrov, D. Kashchiev, T. Vitanov and E. Budevski | 387 | A model for the structural tranformation processes in lead monolayer adsorbate on Ag(111) faces at high coverages |
| J. Bácskai, V. Kertész and G. Inzelt | 393 | An electrochemical quartz crystal microbalance study of the influence of pH and solution composition on the electrochemical behaviour of poly(aniline) films |
| I. Montero, A. Climent-Font, J. Perrière, D. Levy and J. M. Martinez-Duart | 399 | Formation kinetics and composition of titanium silicide anodic oxide |
| W. G. Proud and C. Müller | 405 | The electrodeposition of nickel on vitreous carbon: impedance studies |
| S. K. Ratkje, H. Rajabu and T. Førland | 415 | Transference coefficients and transference numbers in salt mixtures relevant for the aluminium electrolysis |
| S. J. C. Cleghorn and D. Pletcher | 425 | The mechanism of electrocatalytic hydrogenation of organic molecules at palladium black cathodes |
| J. P. Pereira-Ramos, R. Baddour-Hadjean, N. Kumagai and K. Tanno | 431 | Improvement of the electrochemical behaviour of $WO_3$ as reversible cathodic material for lithium batteries |
| F. I. Danilov and A. B. Velichenko | 437 | Electrocatalytic activity of anodes in reference to Cr(III) oxidation reaction |
| W. Zhang and S. Dong | 441 | Effects of dopant and solvent on the properties of polypyrrole: investigations with cyclic voltammetry and electrochemically *in situ* conductivity |

S. K. RATKJE and S. MØLLER-HOLST 447 Exergy efficiency and local heat production in solid oxide fuel cells

A. P. SHORYGIN and YU. V. TOLKACHYOV 455 The influence of free convective processes in a weak gravitational field on the characteristics of an electrochemical cell in conditions nearly equal to those of the limiting current

K. XIAO, E. R. GONZALEZ, A. ANANI, S. SRINIVASAN and A. J. APPLEBY 459 High photovoltage multilayer organic dye photocells

*Short Communication*
F. C. WALSH 465 Determination of the normalised space velocity for continuous stirred tank electrochemical reactors

*Book Review*
R. D. ARMSTRONG 469 *Advances in Electrochemical Science and Engineering: Volume* 2: Edited by H. GERISCHER and C. W. TOBIAS

471 Erratum

473 Papers in Press

475 Electrochemical Calendar

## NUMBER 4

i ISE pages

J.-Y. TILQUIN, J. GLIBERT and P. CLAES 479 Qualitative and quantitative electrochemical studies of multivalent elements in molten oxide glasses

S. ROUQUETTE-SANCHEZ and G. PICARD 487 Electrochemical oxidation of a metal involving two successive charge transfer steps with adsorbed intermediate species—I. Theoretical expressions for the steady state current–potential curves

B. MAZURKIEWICZ 495 Anodic passivity of iron in sulphuric acid

H. OKAMOTO and N. TANAKA 503 Potential oscillation mechanism for formaldehyde oxidation on platinum

I. KANAZIRSKI, M. BOJINOV and A. GIRGINOV 511 Electrical properties of the barrier layer/solution interface and its role during breakdown of anodic bismuth oxide films

M. SCHELL and XIAORONG CAI 519 Chaotic and periodic switching in cyclic voltammetric responses of methanol and primary alcohols in alkaline solutions

M. UMEZAWA, M. KOJIMA, H. ICHIKAWA, T. ISHIKAWA and T. NONAKA 529 Electroreductive polymerization of dichlorocarbosilanes

A. MILCHEV, E. MICHAILOVA, R. LACMANN and B. MÜLLER-ZÜLOW 535 Electrochemical growth of single metal and alloy clusters—Part I. Galvanostatic conditions

S. WASMUS and W. VIELSTICH 541 Electrooxidation and reduction of propylenecarbonate, ethylene carbonate and 1,2-propanediol in aqueous acid solution—a comparative study using on-line MS and isotope labelled electrolytes

H. H. RÜTTINGER, J. SCHIEWE and H. MATSCHINER 553 On electrochemical reduction of $SO_2$-amine adducts

H. EZAKI, M. MORINAGA and S. WATANABE 557 Hydrogen overpotential for transition metals and alloys, and its interpretation using an electronic model

J. J. ROSENBERG, M. BOUZOU, O. CERCLIER and J. ESTIENNE 565 An investigation of modified AgI solid electrodes containing the homopiperazinium cation—I. Synthesis and characterization

J. J. ROSENBERG, M. BOUZOU, O. CERCLIER and J. ESTIENNE 571 An investigation of modified AgI solid electrolytes containing the homopiperazinium cation—II. Electrochemical behaviour in the N,N,N′,N′-tetramethylhomopiperazinium diiodide-silver iodide system and application to solid state batteries

J. A. SCHMIDT, M. R. PRAT and J. C. BAZÁN 577 Copper electrodeposition on glassy carbon from a solid electrolyte

G. CHE and S. DONG — 581 — Electrochemical catalysis at an ultramicroelectrode modified with redox species

P. FELLNER, O. KOBBELTVEDT, Å. STERTEN and J. THONSTAD — 589 — Electrical conductivity of molten cryolite-based binary mixtures obtained with a tube-type cell made of pyrolytic boron nitride

T. SUGIURA, R. TENPAKU, H. MINOURA and Y. UENO — 593 — Microscopic observation of the grain structure of photoetched $CdSe_xS_{1-x}$ solid solution and CdSe–CdS mixed crystal semiconductor electrodes

J. JACQUELIN — 597 — Theoretical impedances of point/plane electrode configuration

K. PEKMEZ, M. CAN and A. YILDIZ — 607 — Electrochemistry in aprotic solvents containing anhydrous perchloric acid: electroreduction behavior of quinones

E. LOJOU, M. DEVAUD, M. HEINTZ, M. TROUPEL and J. PERICHON — 613 — Electroreduction of aryl halides in DMF solutions on to a cadmium modified gold electrode

K. MOMOTA, M. MORITA and Y. MATSUDA — 619 — Electrochemical fluorination of benzene in acetonitrile solutions

*Book Reviews*

J. M. SYKES — 625 — *Proceedings of an International Symposium on Corrosion Science and Engineering in Honour of Marcel Pourbaix's 85th Birthday.* Edited by R. A. RAPP, N. A. GOKCEN and A. POURBAIX

O. R. BROWN — 626 — *Analogue Electronics.* By J. C. MORRIS

O. R. BROWN — 626 — *Electrical Networks.* By A. HENDERSON

627 Papers in Press

629 Electrochemical Calendar

## NUMBER 5

i ISE pages

O. GEBHARDT — 633 — A phase reference procedure for interpretation of impedance spectroscopy experiments

T. HURLEN, S. HORNKJØL and E. GULBRANDSEN — 643 — The active dissolution of chromium

M. WÜNSCHE, R. J. NICHOLS, R. SCHUMACHER, W. BECKMANN and H. MEYER — 647 — Influence of the additives (TU) and (PEG) on the underpotential deposition of copper on platinum electrodes: a coulometric, microgravimetric and topographic study

M. LAMRANI and G. MOUSSET — 653 — Electrochemical reduction of chloro-bis(dionato) iron (III) complexes in non-aqueous medium

M. MATSUOKA, K. ASAI, Y. FUKUMOTO and C. IWAKURA — 659 — Surface modification of hydrogen storage alloy electrode with an alkaline solution containing potassium borohydride as a reducing agent

S. C. RAJ and M. SKYLLAS-KAZACOS — 663 — Cathodic processes at $TiB_2$/C-composite electrodes during aluminium electrolysis

R. BERTAZZOLI and D. PLETCHER — 671 — Studies of the mechanism for the electrodeposition of Fe–Co alloys

J.-CH. GARD, J. LESSARD and Y. MUGNIER — 677 — An efficient electrochemical method for the synthesis of nitrosobenzene from nitrobenzene

D.-T. CHIN, R. SASANGAN and G. SABDE — 681 — Simultaneous determination of electrolyte diffusivity and concentration using alternating current

A. IWASE and A. IGARASHI — 689 — Electrochemistry of acetylacetonato/lanthanide (III) tetraphenylporphyrinates

B. W. JOHNSON and K. DOBLHOFER — 695 — Barium fluoride as an internal reflection element for *ir*-ATR spectroelectrochemistry

M. PÉREZ SÁNCHEZ, R. M. SOUTO, M. BARRERA, S. GONZÁLEZ, R. C. SALVAREZZA and A. J. ARVIA — 703 A mechanistic approach to the electroformation of anodic layers on copper and their electroreduction in aqueous solutions containing $NaHCO_3$ and $Na_2CO_3$

T. ŁUCZAK, M. BEŁTOWSKA-BRZEZINSKA and R. HOLZE — 717 Molecular structure effects in the adsorption of terminal and vicinal aliphatic diols on a gold electrode

K. MAKSYMIUK — 721 Kinetics of electrodeposition reactions in mixed solvents—a quantitative description

H. KANEKO, K. TANAKA, A. IWASAKI, Y. ABE, A. NEGISHI and M. KAMIMOTO — 729 Water electrolysis under microgravity condition by parabolic flight

*Short Communication*

F. VICENTE, A. ROIG, C. SANZ and J. LÓPEZ — 735 Apparent activation energies and apparent frequency factor in polarographic waves of paludrine-Zn(II)

739 Future Special Issues

741 Papers in Press

743 Electrochemical Calendar

## NUMBER 6

i ISE pages

T. OKAJIMA, H. SAKURAI, N. OYAMA, K. TOKUDA and T. OHSAKA — 747 Electrical equivalent circuit parameters for montmorillonite clay film-coated quartz crystal oscillators in contact with air, moisture and electrolyte solutions

A. AGOSTIANO, D. C. GOETZE and R. CARPENTIER — 757 Photoelectrochemistry of thylakoid and sub-thylakoid membrane preparations: cyclic voltammetry and action spectra

I. ANNERGREN, M. KEDDAM, H. TAKENOUTI and D. THIERRY — 763 Application of electrochemical impedance spectroscopy and rotating ring–disc measurements on Fe–Cr alloys

G. LÁNG, J. BÁCSKAI and G. INZELT — 773 Impedance analysis of polymer film electrodes

C. MATHIEU, A. ETCHEBERRY, M. HERLEM, F. IRANZO-MARÍN, J. LIANG and J.-L. SCULFORT — 781 n–InP flat band potential: a pH probe in nonaqueous and mixed solvents?

M. MATSUOKA, T. KOHNO and C. IWAKURA — 787 Electrochemical properties of hydrogen storage alloys modified with foreign metals

E. THEODORIDOU, A. D. JANNAKOUDAKIS, P. D. JANNAKOUDAKIS, N. PAGALOS, J. O. BESENHARD, C. I. DONNER and M. WICHER — 793 Controlled spatial distribution of noble metal catalysts on electrochemically activated carbon fibre supports

Z. MOROŃ — 799 Useful formulae enabling interpolation of experimental conductance data of electrolyte solutions, over a wide range of concentrations

CH. LABAR — 807 Potentiometric stripping analysis and the speciation of heavy metals in environmental studies

A. NARĘBSKA and S. KOTER — 815 Permselectivity of ion-exchange membranes in operating systems. Irreversible thermodynamics treatment

J. CROUSIER, J. P. CROUSIER and F. BELLUCCI — 821 Electrochemical and electrocatalytic behaviour of iron–base amorphous alloys in 1M KOH at 25°C

Y. ZHANG and C. CHA — 827 *ac* impedance, SEM and EDAX study of the passivation of a carbon cathode in $LiAlCl_4$–$SOCl_2$ electrolyte

D. SAZOU and M. PAGITSAS — 835 Current oscillations associated with pitting corrosion processes induced by iodide ions on the partially passive cobalt surface polarized in sulphuric acid solutions

*Short Communication*

K. SCOTT and A. O. IBHADON — 847 An integrated electrochemical reaction and supported liquid membrane approach to recycling

*Book Review*

R. D. ARMSTRONG — 851 *Modern Aspects of Electrochemistry No.* 22. Edited by J. O'M. BOCKRIS, B. E. CONWAY and R. E. WHITE

853 Future Special Issues

855 Papers in Press

857 Electrochemical Calendar

## NUMBER 7

i ISE pages

G. S. POPKIROV and R. N. SCHINDLER — 861 Validation of experimental data in electrochemical impedance spectroscopy

R. C. D. PERES, V. F. JULIANO, M.-A. DE PAOLI, S. PANERO and B. SCROSATI — 869 Electrochromic properties of dodecyclbenzenesulfonate doped poly(pyrrole)

J. GARRIDO, V. COMPAÑ and M. L. LÓPEZ — 877 Electrical magnitudes in gravitational and centrifugal systems

D. A. SHIFLER, P. J. MORAN and J. KRUGER — 881 Passivity of 1018 carbon steel in dimethoxyethane with $LiAsF_6$—observation of electropolymerization

P. ALLONGUE and S. BLONKOWSKI — 889 Influence of the doping concentration on the electrochemical etching of semiconductors

L. D. BURKE, J. K. CASEY and J. A. MORRISSEY — 897 An investigation of some of the variables involved in the generation of an unusually reactive state of platinum

R. JANSEN and F. BECK — 907 Anodic oxidation of cobalt and copper–$N_4$ chelates in the solid state

N. GIORDANO, E. PASSALACQUA, P. L. ANTONUCCI, L. PINO, M. VIVALDI, A. PATTI and K. KINOSHITA — 913 Influence of physicochemical properties on the performance of Pt/C porous electrodes for oxygen reduction in phosphoric acid

M. XU, W. HORSTHEMKE and M. SCHELL — 919 Comparison of zeolite-modified electrodes with a graphite electrode: postulated enhancement of electroactivity through stabilization of intermediates

R. T. CARLIN, T. SULLIVAN, J. W. SHERMAN and C. A. ASPINWALL — 927 Asymmetric electrode kinetics induced by concurrent metal–ligand bond dissociation

T. V. NGUYEN and R. E. WHITE — 935 A mathematical model of a hermetically sealed lead–acid cell

R. HOLZE — 947 The electrosorption of imidazole on a gold electrode as studied with spectroelectrochemical methods

A. AREVALILLO and M. J. PENA — 957 Complex species of Zn(II) and Cu(II) in Tris buffer solution–II Cu(II)

F. MIRALLES-ROCH, A. TALLEC and R. TARDIVEL — 963 Electrochemical conversion of $\alpha$-nitrobenzylic compounds into the corresponding oximes—Part 1. Electroanalytical investigations

K. REISELHUBER, G. DORNER and M. W. BREITER — 969 Studies of BICUVOX.10 by conductivity measurements and differential thermal analysis

H. E. TOMA and A. D. P. ALEXIOU — 975 Dynamic electrochemical behaviour of a trinuclear $\mu$-oxo ruthenium acetate cluster containing pyridine and dimethylsulphoxide ligands

A. H. MOREIRA, A. V. BENEDETTI, P. L. CABOT and P. T. A. SUMODJO — 981 Electrochemical behaviour of copper electrode in concentrated sulfuric acid solutions

C. HASIOTIS, J. K. GALLOS and G. KOKKINIDIS — 989 Electrochemical behaviour of furazano[3,4-b]-quinoxaline 1-oxides and 2,3[1H,4H]-quinoxalinedione dioximes

B. E. CONWAY and D. P. WILKINSON — 997 Non-isothermal cell potentials and evaluation of entropies of ions and of activation for single electrode processes in non-aqueous media

| | | |
|---|---|---|
| Y.-K. Lai and K.-Y. Wong | 1015 | The electrocatalytic oxidation of methanol by a ruthenium(V) oxo complex |
| S. Bourkane, C. Gabrielle, F. Huet and M. Keddam | 1023 | Investigation of gold oxidation in sulfuric medium—I. Electrochemical impedance techniques |
| B. Wang and S. Dong | 1029 | Electrochemical study of isopoly- and heteropoly-oxometallates film modified microelectrodes—Part 3. Further study of electrode process of isopolymolybdic anion doped in polyaniline film |
| A. Kunugi, K. Yamane, M. Yasuzawa, H. Matsui, H. Uno and K. Sakamoto | 1037 | Electrochemical method to vinyl fluorides—I. Cathodic elimination of 1-fluoro-2-arylvinyl phenyl sulphones in acetonitrile |
| *Short Communications* | | |
| A. Lewandowski | 1043 | Standard potential of Tl/$Tl^+$ 222 electrode and stability of $Tl^+$ 222 cryptate in aprotic media |
| C. Láng, L. Kocsis and G. Inzelt | 1047 | Application of the Kramers–Kronig transformation for the data validation of impedance spectra of electroactive polymer films on electrodes |

R. D. ARMSTRONG and HONG WANG 2373 Ion transport in PVC–DOPP membranes

F. MIRALLES-ROCH, A. TALLEC and R. TARDIVEL 2379 Electrochemical conversion of α-nitrobenzylic compounds into the corresponding oximes—Part 2. Macroscale electrolyses

G. INZELT and V. KERTÉSZ 2385 Experimental evidence for the periodical changes of the amount of chemisorbed species accompanying the potential oscillations produced in the course of galvanostatic oxidation of formic acid on platinum

L. THOUIN, S. ROUQUETTE-SANCHEZ and J. VEDEL 2387 Electrodeposition of copper–selenium binaries in a citric acid medium

S. DENNISON 2395 Studies of the cathodic electrodeposition of CdS from aqueous solution

K. YAMADA, T. NISHINA, I. UCHIDA and J. R. SELMAN 2405 Kinetic study of oxygen reduction in molten $Li_2CO_3$–$K_2CO_3$ under pressurized conditions

H. GROULT, D. DEVILLIERS, M. VOGLER, C. HINNEN, P. MARCUS and F. NICOLAS 2413 Electrochemical behaviour and surface analysis of crude and modified carbon electrodes for fluorine production

J. ZHANG and F. C. ANSON 2423 Electrocatalysts for the reduction of $O_2$ and $H_2O_2$ based on complexes of Cu(II) with the strongly adsorbing 2,9-dimethyl-1,10-phenanthroline ligand

H. YAMASHITA and K. YOSHIMOTO 2431 Application of a membrane-electrode composite assembly to the cathodic reaction in brine electrolysis

YU. E. ROGINSKAYA, O. V. MOROZOVA, G. I. KAPLAN, R. R. SHIFRINA, M. SMIRNOV and S. TRASATTI 2435 Thermally prepared $Ti/RhO_x$ electrodes—I. Structural, electronic and surface properties

E. SIKORA, A. SADKOWSKI and J. FLIS 2443 Impedance study of effect of phosphorus on anodic behavior of iron in carbonate/bicarbonate solutions

I. PASEKA 2449 Sorption of hydrogen and kinetics of hydrogen evolution on amorphous Ni–$S_x$ electrodes

E. MICHAILOVA, I. VITANOVA, D. STOYCHEV and A. MILCHEV 2455 Initial stages of copper electrodeposition in the presence of organic additives

E. BRILLAS, J. A. GARRIDO, R. M. RODRÍGUEZ, J. M. BERROCAL and R. OLIVER 2459 Medium effect on the electrochemical behaviour of the $Zn^{2+}/Zn(Hg)$ system in aqueous 1,2-propanediol solutions

A. S. DAKKOURI, N. BATINA and D. M. KOLB — 2467 The influence of organic additives on the underpotential deposition of Cu on Pt(111)

2473 Future Special Issues

2474 Papers in Press

## NUMBER 17

i ISE pages

M. CARIOU, K. EL HOBBI and J. SIMONET — 2481 Electro-oxidation of 2,4,6-tris(dialkylamino)-1,3,5-triazines: anodic methoxylation of the dimethylamino derivative

F. BEDIOUI, Y. BOUHIER, C. SOREL, J. DEVYNCK, L. COCHE-GUERENTE, A. DERONZIER and J. C. MOUTET — 2485 Incorporation of anionic metalloporphyrins into poly(pyrrole-alkylammonium) films—Part 2. Characterization of the reactivity of the iron (III) porphyrininc-based polymer

A. WIDELÖV — 2493 Pyrolysis of iron and cobalt porphyrins sublimated onto the surface of carbon black as a method to prepare catalysts for $O_2$ reduction

G. INZELT, G. LÁNG, V. KERTÉSZ and J. BÁCSKAI — 2503 Effect of the temperature on the conductivity and capacitance of poly(aniline) film electrodes

T. OGATA, M. ABE and K. MATSUKI — 2511 *In situ* measurement of free radicals in manganese dry cells

P. N. BARTLETT and V. EASTWICK-FIELD — 2515 A reinvestigation of the electrochemistry of $[Ni^{(II)}(bpy)_3(ClO_4)_2]$ in acetonitrile using rotating disc and rotating ring-disc electrodes

J. ROJO and A. BRONSON — 2525 Numerical analysis of certain solutions of Laplace's equation to calculate the ohmic potential drop after scribing

J. YI, A. KALOYANNIS and C. G. VAYENAS — 2533 High temperature cyclic voltammetry of Pt catalyst-electrodes in solid electrolyte cells

L. TOMCSÁNYI, ZS. NAGY, J. SOMLAI and J. BORSZÉKI — 2541 Electrochemical study of the pitting corrosion of aluminium and its alloys—III. The role of bonded water and the kinetics of formation and reformation of a passive layer

J. BENZAKOUR and A. DERJA — 2547 Electrochemical passivation of iron in phosphate medium

B. VOOS, W. PLIETH, R. H. K. BÖRNER and R. SCHÖLLHORN — 2551 Preparation of monolayers and multilayers of mixed thallium (III)–lead(IV)-oxides

B. H. ERNÉ, D. VANMAEKELBERGH and I. E. VERMEIR — 2559 The anodic dissolution of InP studied by the optoelectrical impedance method—1. Competition between electron injection and hole capture at InP photoanodes

I. E. VERMEIR, W. P. GOMES, B. H. ERNÉ and D. VANMAEKELBERGH — 2569 The anodic dissolution of InP studied by the optoelectrical impedance method—2. Interaction between anodic and chemical etching of InP in iodic acid solutions

D. ENDE, W. KESSLER, D. OELKRUG and R. FUCHS — 2577 Characterization of chromate–phosphate conversion layers on Al-alloys by electrochemical impedance spectroscopy (EIS) and optical measurements

A. AGOSTIANO, M. CASELLI, M. DELLAMONICA and S. LAERA — 2581 Characterization of polypyrrole films electrodeposited by water solutions: effect of the supporting electrolyte and cytochrome *c* immobilization

H. SARAÇ, A. A. WRAGG and M. A. PATRICK — 2589 Natural convection mass transfer at a horizontal cylinder electrode with an opposed thermal buoyancy effect

P. BJÖRNBOM and S.-C. YANG — 2599 Modeling and simulation of the operation of a whole alkaline fuel cell by using concentrated electrolyte solution transport theory

I. B. SINGH, S. SULTAN and K. BALAKRISHNAN — 2611 Cyclic voltammetric behaviour of platinum in dried and wet nitrates melt

G. Gusmano, G. Montesperelli, P. Nunziante and E. Traversa — 2617 Study of the conduction mechanism of $MgAl_2O_4$ at different environmental humidities

C. Tsiamis, P. D. Jannakoudakis, N. Sachsinger and H. Hennig — 2623 Substituent effects in the electrochemical behaviour of some mixed-ligand copper(II) chelates containing $\beta$-ketoenols and 1,2-diamines

*Short Communication*
Z. H. Gu, J. Chen and T. Z. Fahidy — 2631 The magnetic field effect on the pre-oscillatory formation kinetics of anodic oxide layers

2635 Future Special Issues

2637 Papers in Press

2639 Electrochemical Calendar

## NUMBER 18

i ISE pages

C. Lim and S.-I. Pyun — 2645 Theoretical approach to Faradaic admittance of hydrogen absorption reaction on metal membrane electrode

G. Paasch, K. Micka and P. Gersdorf — 2653 Theory of the electromechanical impedance of macrohomogeneous porous electrodes

P. Nikitas — 2663 Some comments on the thermodynamic determination of the size ratio parameter

E. Fontes, C. Lagergren and D. Simonsson — 2669 Mathematical modelling of the MCFC cathode

S. J. C. Cleghorn and D. Pletcher — 2683 Investigations of the electrocatalytic hydrogenation of organic molecules at palladium on nickel cathodes

T. M. Nahir and R. P. Buck — 2691 Steady-state-current impedance spectroscopy of plasticized PVC membranes containing neutral ion carriers

S. L. Marshall — 2699 Analysis of kinetic and ohmic polarization effects in passivation processes under potentiodynamic control

Lin Song, Shen Dazhong, Nie Lihua and Yao Shouzhuo — 2707 The transfer mechanisms and analytical properties of the variable-valency drug cinchonidine across the liquid/liquid interface

J. T. Hwang and J. S. Chung — 2715 The morphological and surface properties and their relationship with oxygen reduction activity for platinum–iron electrocatalysts

C. P. Wilde and M. Zhang — 2725 The influence of lead *upd* on the oxidation of glucose at platinum electrodes. An electrochemical quartz crystal microbalance study

A. Survila, P. Kalinauskas and V. Uksienė — 2733 Photoelectrochemical phenomena at the interface Cu/Cu(II), glycine, $\alpha$- or $\beta$-alanine

P. L. Cabot, F. A. Centellas, E. Pérez and R. Loukili — 2741 Pitting and repassivation processes of Al–Zn–Mg alloys in chloride solutions containing sulphate

Chun Nan Ho and Bing Joe Hwang — 2749 Effects of copper cation and acetate anion on the growth of $PbO_2$ on a $SnO_2$/Ti substrate

P. M. S. Monk, J. A. Duffy and M. D. Ingram — 2759 Electrochromic display devices of tungstic oxide containing vanadium oxide or cadmium sulphide as a light-sensitive layer

I. C. Faria, R. Torresi and A. Gorenstein — 2765 Electrochemical intercalation in $NiO_x$ thin films

Ma Ling, Li Hu-lin and Cai Cheng-liang — 2773 Electrocatalytic reduction of nitrate by foreign Pb adatoms

*Short Communications*
M. Pankuch, R. Bell and C. A. Melendres — 2777 Composition and structure of the anodic films on titanium in aqueous solutions

C. DESLOUIS, O. R. MATTOS, M. M. MUSIANI and B. TRIBOLLET — 2781 Comments on mechanisms of copper electrodissolution in chloride media

2785 Future Special Issues

## AIMS AND SCOPE

This international journal is intended for the rapid publication of both original work and reviews in the field of electrochemistry. Electrochemistry should be interpreted to mean any of the Divisions of the International Society of Electrochemistry, *ie*

(1) Fundamental Interfacial Electrochemistry
(2) Electrode and Electrolyte Materials
(3) Analytical Electrochemistry
(4) Molecular Electrochemistry
(5) Electrochemical Energy Conversion
(6) Corrosion, Electrodeposition and Surface Treatment
(7) Industrial Electrochemistry and Electrochemical Engineering
(8) Bioelectrochemistry.

## GUIDE TO AUTHORS

Papers should be submitted directly to the Editor-in-Chief, except that authors from North America *may* instead send their papers to the North American Regional Editor: E. J. Cairns, Energy & Environment Div. Bldg 90, Lawrence Berkeley Laboratory, University of California, Berkeley, CA 94720, U.S.A.

1. Papers submitted to *Electrochimica Acta* should consist of (i) critical reviews, (ii) full length research papers or (iii) short communications, *not previously published*, in the field of pure and applied electrochemistry. Authors intending to offer critical reviews are advised first to contact the Editor-in-Chief. Short communications should take up no more than *two* printed pages in the journal and will be handled more rapidly if supplied in camera-ready format, in which case papers may be up to *four* pages long. Papers that are accepted may not be published elsewhere in any language without the consent of the Editor-in-Chief. Papers from non-members of Int. Soc. of Electrochemistry are welcome.

2. Papers will only be published if they are likely to be of interest to our subscribers. Thus papers which deal solely with the *dc* polarography of substances will probably not be accepted, whilst papers dealing with conductance or *emf* measurements on ambient temperature electrolytes should generally be submitted in the form of Short Communications. All papers will be refereed.

3. **Only English language papers will be accepted.** An abstract not exceeding 200 words must be provided. For Short Communications an abstract not exceeding 50 words should be provided. Authors must provide **FIVE KEY WORDS** at the end of each abstract.

4. Papers should be submitted **IN TRIPLICATE** to facilitate refereeing. Where there may be postal delays authors are advised to send an additional copy to Newcastle by fax at the same time that they post their three copies. **One top copy** and **two** Xerox copies are acceptable. They should be typed in **double spacing on one side of the paper only.** Detailed descriptions of apparatus etc. should be given only if such apparatus is new.

5. The author responsible for proofs and correspondence must be identified on the manuscript. Failure to do this can be a major cause of delay in publication. **ONCE A MANUSCRIPT HAS BEEN ACCEPTED, QUERIES REGARDING THE PROGRESS OF PUBLICATION SHOULD BE ADDRESSED TO THE PRODUCTION EDITOR** at Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. In the interests of speedy publication galley proofs are not submitted to authors. The difficulty and expense involved in making corrections to page proofs make it essential for authors to prepare their manuscripts carefully so that alteration is not required. The cost of excessive alteration at the proof stage may have to be charged to the author.

6. Illustrations should be on separate sheets the same size as the typescript, in any case no larger than A4 (209 by 296 mm). **Legends for illustrations should also be on a separate sheet;** they should render the illustration intelligible without reference to the text. **ONE SET OF ORIGINAL LINE DRAWINGS** and two sets of photocopies should be furnished, drawn boldly to twice the final size required, with lettering in light pencil. The following standard symbols easily available to the printer for legends should be used:

○ ● + × □ ■ △ ▲ ◇ ◆ ▽ ▼

Photographs and photomicrographs should be included only if absolutely *essential*. If artwork needs to be redrawn this may cause a delay.

7. Tables should be kept to a minimum; no data can be recorded in both graphical and tabular form. Essential tables should be provided with headings, and should be intelligible without reference to the text. In the interest of economy and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the authors' manuscripts.

8. Authors are requested to provide **FIVE KEY WORDS** for future indexing.

9. References should be indicated in the text in square brackets, and listed at the end of the paper as follows:

1. K. F. Bonhoeffer and H. Gerischer, *Z. Elektrochem.* **52**, 149 (1948).
2. U. R. Evans, *Metallic Corrosion, Passivity and Protection*, 2nd edn, p. 32. Arnold, London (1964).

Abbreviations of journal titles should follow those in *World List of Scientific Periodicals* (Fourth Edition).

10. Each paper should be consistent within itself as to abbreviations, symbols and units. Authors should use wherever possible SI units and when these are not used should provide a conversion factor to SI units. Axes for graphs and headings for tables should be given in quantity calculus form, e.g. times as $t$/s, potential as $E$/mV, current density as $i$/A m$^{-2}$. Any electrochemical abbreviations should be written without stops, e.g. *emf*, *pd*, *ac*, etc.

11. Reprints can be ordered on the form accompanying proofs.

12. If the above recommendations are followed, it will be possible to publish accepted papers with a minimum of delay. **Papers not conforming to this Guide will, however, inevitably suffer much delay and in extreme cases may have to be rejected entirely.** The Editors will warmly appreciate the co-operation of authors in preparing papers in a manner that will facilitate the complex work of publication.

13. The original manuscript and diagrams will be discarded 1 month after publication unless the Publisher is requested to return original material to the author.

14. Material for the Calendar should be sent to the Editor-in-Chief: Dr R. D. Armstrong, Chemistry Department, The University, Newcastle upon Tyne NE1 7RU, England. **Organizers are asked to submit details at least 6 months before the date of the event.**
